Subject: Revised Tech Memo - IW Sampling of IUs for Phthalates & Benzyl Alcohol
Attachments: LDW_KCIW_2006_Sampling_of_IUs_TM.doc

Jeff and IW Capital Projects Team;

Based on feedback I received at the recent LDW Source Control Work Group meeting, I decided to revise the 12/6/07 tech memo regarding IW sampling of industrial users (IUs) for BNAs. This revision includes some minor typo corrections as well as new verbiage at the end to discuss the impact of elevated detection limits on non-detect values.

Please review and provide any feedback by 1/29/08. I plan to deliver the final version at the LDW Source Control Focus Group meeting on 02/07/08.

Thanks,

Bruce
